SKILLS

- **Languages:** C#, TypeScript, JavaScript, T-SQL
- **Front-end:** Angular, Razor HTML, CSS/SCSS, Bootstrap, jQuery
- **Back-end:** .NET (Core), Entity Framework (EF Core), LINQ, ASP.NET Web API
- **Database:** Microsoft SQL Server
- **Tools:** npm, Vite, Cordova, Git/GitHub, TortoiseSVN, Postman, VS Code, Visual Studio

WORK EXPERIENCE

Full-Stack Software Developer

Aug 2025 – Present

Smart Software Solutions

- Expanded a cross-platform .NET RESTful API to support secure JWT authentication using a refresh token system for a mobile application while maintaining cookie-based sessions for the web platform.
- Enabled seamless user authentication across iOS and Android by integrating a Cordova biometrics library, allowing for secure Face ID and fingerprint logins.
- Modernized database transaction handling by introducing rollback/commit patterns and structured error handling, improving reliability and reducing data integrity issues.
- Refactored Angular front-end architecture from template driven to reactive forms, enforcing consistent client side validation and error handling.
- Integrated Tesseract OCR to extract and auto-fill fields with Machine Readable Zone (MRZ) data from passports, achieving over 90% parsing accuracy.
- Transformed Figma designs into interactive and responsive front-end views, using modern CSS/SCSS and Bootstrap to achieve fluid UI across multiple screen sizes on both web and mobile.
- Developed data-driven admin customization pages empowering clients to self-manage pages, email contents, and dynamic field layouts.
- Automated build deployments to the dev server via task scripts, reducing manual build times by 30%.

Computer Science Teaching Assistant

Jan 2023 – May 2024

University of Rochester

- Spearheaded weekly technical labs for 150+ students in core Data Structures & Algorithms topics.
- Guided students through problem-solving, debugging, and code architecture during study sessions.

Computer Science Workshop Leader

Jan 2022 – Dec 2022

University of Rochester

- Led weekly workshops for groups of 10+ students on data structures and algorithm topics.
- Participated in weekly leadership class focused on teamwork and communication.

PROJECTS ([Full Portfolio](#))

Entity Component System Web Game

May 2026

- Engineered a high performance data-oriented web game in TypeScript by leveraging an Entity Component System, optimizing for cache locality via flat TypedArrays to handle 2,000+ active entities.
- Built a custom spatial hashing collision system, and sprite pooling to reduce garbage collection.

EDUCATION

University of Rochester

Graduated

Bachelor of Science, Computer Science

- Cumulative GPA: 3.81 (out of 4.0)
- Tom Hope Memorial Media Scholar Award
- Water Polo Club Business Manager
